

SMITH BROTHERS CONSTRUCTION

A builder and remodeler of fine custom homes

TO HELP BUILD BETTER LIVES, SMITH BROTHERS CONSTRUCTION CONTRIBUTES IN RECENT FUNDRAISER TO SUPPORT SANFORD-BURNHAM MEDICAL RESEARCH INSTITUTE

FOR IMMEDIATE RELEASE

(San Diego, April 15, 2010) Smith Brothers Construction recently participated in a fundraiser in San Diego to help support the continued growth and research activities at the Sanford-Burnham Medical Research Institute.

Sanford-Burnham Medical Research Institute (Sanford-Burnham), formerly Burnham Institute for Medical Research, is dedicated to discovering the fundamental molecular causes of disease and devising the innovative therapies of tomorrow.

While construction and home building is one of the hardest hit industries, Smith Brothers Construction continues to participate in charity events. “We understand the pressures that many organizations have trying to support the community”, stated Jeff Smith, President of Smith Brothers Construction. “This is truly one of the finest medical research firms in the world, and the growth of their programs depend on contributions from other companies.”

Sanford-Burnham, with operations in California and Florida, is one of the fastest-growing research institutes in the country. The Institute ranks among the top independent research institutions nationally for NIH grant funding and among the top organizations worldwide for its research impact.

Cheryl Smith, partner with Jeff Smith in Smith Brothers Construction noted, “The discoveries and advances made by Sanford-Burnham are truly amazing and impact the quality of human life. It’s a cause we eagerly support.”

Since 1978, Smith Brothers Construction has been the premier choice for performing luxury “design build” new home construction, as well as remodeling of fine custom homes. As an award winning builder, Smith Brothers Construction is fully licensed, insured and bonded in the states of Hawaii and California with offices in Honolulu, Laguna Beach, San Diego and San Francisco. Their project gallery is available for viewing at their website, www.smithbrothersconstruction.com
